I think they are ok on the authority if my interpretation is correct (hence, why I focused on the reg change), since 2118 identifies under a permit as provided for in the chapter (so general reference to other authorities in the chapter). However, even better authority reference would be 2120 because it specifies the role of the commission in the overall regulatory and permitting scheme.

The statement could also be interpreted as a request to remove Mustelidae entirely and not just ferrets. I'll see if I can get in touch with the petitioner and clarify the meaning. Note that even if we get a clarification, the petitioner will still need to supply the correct authority before acceptance, as it's not cited anywhere.

Agree that it would be best to have something in writing, because the petition says nothing about what change is requested...statement could also be interpreted to mean a change to F&G Code, but FGC obviously has no authority there (in which case petition should be rejected).

Melissa- This makes sense. I'm glad you pulled me in to your office to talk through it (with T14 in hand) while Ari was at core team meeting. An email from Ari to Pat Wright could be useful to convey that this is how we are interpreting it.

Ari? Thoughts?

...does not make sense to me WRT what is being requested of FGC. I'm changing the short description in the master table, but here is what it currently says:

Domestic ferrets do not belong on a list of Wild Animals.

I am changing to:

Add domestic ferrets under family Mustelidae as an exception to the list of restricted species.

Please confirm that I have characterized correctly.

Thanks,

Melissa
